NROC partners with educators to create open and low-cost courses and tools that are designed to recognize every student’s unique learning needs and preferences.

These resources can be adapted and scaled to meet programmatic goals in a variety of instructional settings.
“Open Educational Resources (OERs) are teaching, learning and research materials in any medium – digital or otherwise – that reside in the public domain or have been released under an open license that permits no-cost access, use, adaptation and redistribution by others with no or limited restrictions.”
THE HYBRID MODEL ALLOWS US TO...

support and redistribute OER, from ourselves and partner projects;

build and maintain platforms for enabling people to find, adapt and share OER, and to engage in open educational practices;

invest most of our time and energy into improving learning outcomes, with special attention to college and career readiness;

and stay committed to the effort and investment of our institutional members for the long term, fulfilling the promise of OER.
NROC collaborates with educators to imagine, develop, test, & refine technologies that improve student success.
